(57) Abstract :

The present invention provides smart fitness wristband for real-time health monitoring. The B-Fit Smart Fitness Wristband is designed to provide real-time health monitoring by tracking key vital signs, including heart rate, oxygen saturation (SpO2), and step count. It integrates advanced sensors (MAX30102, MAX30101, and MPU6050) with Bluetooth Low Energy (BLE) connectivity to sync data with a companion mobile app. The system provides proactive health alerts, especially for elderly users, enabling early detection of potential heart-related emergencies.
